

## Potato Programme

### Benefits of the Bionature programme

- Stronger plant growth and improved root development, which helps nutrient uptake and overall tuber bulking.
- Reduced calcium-related disorders (such as internal browning or hollow tubers) by supplying adequate calcium by using Calflux.
- Uniformed tuber size and improved skin finish
- Beneficial for both processing and pre-pack markets, optimising maximum return for the grower.

Improves yield and extends  
productive life

NHDelta products are designed to resist leaching. Thanks to better stability of nitrogen, total loading of nitrogen into the crop can also be significantly reduced.

# 1-4-All

Balanced range of micro  
elements

1-4-All is one product for all crops. Designed to complement our range of Delta and CalFlux products, 1-4-All contains a balanced range of micro-elements for optimised plant growth.

# XSTRESS

Protect your crops from the  
most extreme stresses

XStress is specially designed to minimise the negative effects of environmental stresses on your crops. Its unique blend of nutrients helps protect crop growth in extreme conditions.

# CalFlux

Better delivery system for  
calcium absorption

Calflux is a unique delivery system for calcium absorption. It allows plants to absorb and maintain calcium in parts that suffer from symptoms of calcium deficiency.

# Leodita

An organic soil improver  
for healthy crops

Leodita is an organic soil improver based on micronized leonardite with a high content of humic and fulvic acids, made with 100% natural high quality Leonardite
